PROFESSIONAL SUMMARY

Motivated B.Tech student in Artificial Intelligence and Data Science with hands-on experience in machine learning, data analysis, computer vision, and Python programming. Demonstrated ability to design and deliver AI-driven projects with real-world impact. Recognized for innovation and leadership. Seeking a role as an AI Engineer or Data Engineer.

EDUCATION

Bachelor of Technology – Artificial Intelligence and Data Science

Aug 2023 – Mar 2027

Sri Sairam Institute of Technology, Chennai
CGPA: 8.31 (as of 5th Semester)

Higher Secondary Certificate(Class XII)

Jai Gopal National Higher Secondary School, Chennai-600059 | 76.5%

WORK EXPERIENCE

Backend-Maestoriminds(Offline)

June 2026 – July 2026

Built a full-stack Real Estate CRM system using the MERN stack to manage leads, automate lead assignment, track follow-ups, manage properties, and generate reports with secure role-based authentication.

Data Science Intern – Elevate Labs (Online)

Jan 2026 – Mar 2026

Applied core data science techniques including data cleaning, exploratory data analysis, and machine learning model development. Collaborated with team members during project reviews, contributing to continuous improvements and solution optimization.

AIML Intern – Edunet Foundation (Online)

Feb 2025 – Mar 2025

Gained practical experience in supervised and unsupervised machine learning techniques through real-world applications. Collaborated in team-based development sprints and actively participated in project reviews and technical discussions.

PROJECTS

- Agro Puthalavan – AI-Based Smart Agriculture Solution** – Developed an AI-powered agriculture platform for disease detection, crop recommendation, market analysis, and weather updates, and won Second Prize at SDG Goal 13 Ideathon 4.0 among 1,000+ participants.
- Smart Ambulance Traffic Signal System** – Developed an AI-powered smart traffic management system that detects ambulances and automatically clears signals using GPS tracking, GSM communication, and IR-based real-time detection.
- EEGXI – AI-Powered Energy Suit** – Designed an AI-powered wearable suit that harvests and optimizes energy from solar panels and human motion, winning the Best Innovation Idea Award at PERI CREATECH'25 and becoming a finalist in Smart India Hackathon 2025.
- Heritage Quest – Indian Cultural Board Game** – Engineered an AI-powered interactive board game that teaches Indian heritage, culture, and history through immersive gameplay and embedded system integration.
- Smart Real Estate CRM & Lead Management Platform** – Built a scalable **MERN stack** application to streamline real estate operations through automated lead assignment, customer relationship management, role-based access control, follow-up scheduling, and reporting dashboards

TECHNICAL SKILLS

Programming Languages: Python, Java, C

Web Technologies: HTML5, CSS3, React.js, Node.js, Express.js, REST APIs

Libraries & Frameworks: OpenCV (CV2), NumPy, Pandas

Databases: SQL, MongoDB

AI/ML Concepts: Machine Learning, Natural Language Processing (NLP), Computer Vision, Data Structures

Tools & Platforms: Power BI, Arduino, Raspberry Pi, Git, GitHub, VS code, databricks

Soft Skills: Leadership, Presentation, Adaptability, Teamwork

ACHIEVEMENTS & AWARDS

Finalist – IEEE YESIST'25 (Maker Fair Tracks), Malaysia | Finalist – Smart India Hackathon 2025 | 3rd Place (Top 25 Teams) – Startup Pitch Competition, Pimpri Chinchwad University, Pune | Winner – PERI CREATECH'25, Peri Institute of Technology | 2nd Prize – SDG Goal 13 Ideathon 4.0 (1,000+ participants)

CERTIFICATIONS & PUBLICATIONS

Design & Implementation of Human-Computer Interfaces (Elite) – NPTEL | IEEE Conference Paper – ICDSAAI 2025: *Agro Puthalavan: AI-Based Smart Agriculture Solution* | C Programming – Spoken Tutorial, IIT Bombay
